1990 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1171–1176, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 1177, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1178–1184, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1990, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Calculation of Stability Derivatives for Slender Bodies Using Boundary Element Method G90-110

Aeroelasticity and Aeroservoelasticity

Helicopter Trim with Flap-Lag-Torsion and Stall by an Optimized Controller G90-119
Parameter Identification of Aeroelastic Modes of Rotary Wings from Transient Time Histories G90-095
Aeroservoelastic Tailoring for Lateral Control Enhancement G90-067

Configuration Design

Model Following Reconfigurable Flight Control System for the AFTI/F-16 G90-139

Deceleration Systems

Lateral Stability of Gliding Parachutes G90-150

Flight Mechanics

Attitude Projection Method for Analyzing Large-Amplitude Airplane Maneuvers G90-004

Fuels and Fuel Systems

Analysis and Design of Sidestick Controller Systems for General Aviation Aircraft G90-003

Ground Support

Identification, Reduction, and Refinement of Model Parameters by the Eigensystem Realization Algorithm G90-149
Reliable Algorithm for Modal Decomposition G90-128
Second-Order Algorithm for Optimal Model Order Reduction G90-127
Analysis and Design of Sidestick Controller Systems for General Aviation Aircraft G90-003

Landing Dynamics

Analysis and Design of Sidestick Controller Systems for General Aviation Aircraft G90-003
Simulation Investigation of the Effects of Helicopter Hovering Dynamics on Pilot Performance G90-002

Lighter-Than-Air-Systems

Simulation Investigation of the Effects of Helicopter Hovering Dynamics on Pilot Performance G90-002

Man/Machine Interface

Effects of Biodynamic Coupling on the Human Operator Model G90-090
Cooperative Synthesis of Control and Display Augmentation in Approach and Landing G90-068
Design and Evaluation of a Cockpit Display for Hovering Flight G90-066
Pilot-Vehicle Analysis of Multiaxis Tasks G90-047

Manufacturing

Time-Domain Aeroservoelastic Modeling Using Weighted Unsteady Aerodynamic Forces G90-005

Performance

Three-Dimensional Trajectory Optimization for Aircraft G90-135
Control of an Aircraft in Downbursts G90-118

Powerplant Integration

Optimal Coupling Ratio Selection for Flexible Appendage Actuators G90-106

Rotorcraft

Game Theory for Automated Maneuvering During Air-to-Air Combat G90-161
Linear Helicopter Trackers Using Attitude Measurements G90-134
Helicopter Trim with Flap-Lag-Torsion and Stall by an Optimized Controller G90-119
Experimental Study of the Effects of Nonlinearities on Ground Resonance G90-101
Comparison of Test Signals for Aircraft Frequency Domain Identification G90-064

Simulation

Game Theory for Automated Maneuvering During Air-to-Air Combat G90-161
Model for Human Use of Motion Cues in Vehicular Control G90-069
Simulator Motion-Drive Algorithms: A Designer's Perspective G90-048

STOL/VTOL/STOVL

Optimal Autorotational Descent of a Helicopter with Control and State Inequality Constraints G90-131

Vibration

Experimental Study of the Effects of Nonlinearities on Ground Resonance G90-101

Weather Hazards

Inertial Energy Distribution Error Control for Optimal Wind-Shear Penetration G90-136

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Effect of Thrust/Speed Dependence on Long-Period Dynamics in Supersonic Flight G90-167
Lateral Stability of Gliding Parachutes G90-150
Two-Time-Scale Longitudinal Control of Airplanes Using Singular Perturbation G90-137
Time-Domain Aeroservoelastic Modeling Using Weighted Unsteady Aerodynamic Forces G90-005
Attitude Projection Method for Analyzing Large-Amplitude Airplane Maneuvers G90-004

Aircraft Guidance

Navigation Path Planning for Autonomous Aircraft: Voronoi Diagram Approach G90-163

Inertial Energy Distribution Error Control for Optimal Wind-Shear Penetration G90-136
Three-Dimensional Trajectory Optimization for Aircraft G90-135
Control of an Aircraft in Downbursts G90-118
Optimal Paths Through Downbursts G90-117

Aircraft Stability and Control

Effect of Thrust/Speed Dependence on Long-Period Dynamics in Supersonic Flight G90-167
Robust Control Design with Real-Parameter Uncertainty and Unmodeled Dynamics G90-158
Lateral Stability of Gliding Parachutes G90-150
Eigenstructure Assignment with Gain Suppression Using Eigenvalue and Eigenvector Derivatives G90-144
Model Following Reconfigurable Flight Control System for the AFTI/F-16 G90-139
Proposal and Flight Evaluation of a New Pitch-Mode Decoupling System G90-138
Two-Time-Scale Longitudinal Control of Airplanes Using Singular Perturbation G90-137
Nonlinear Flight Control Design via Sliding Methods G90-122
System Identification Requirements for High-Bandwidth Rotorcraft Flight Control System Design G90-120
Control of an Aircraft in Downbursts G90-118
Calculation of Stability Derivatives for Slender Bodies Using Boundary Element Method G90-110
Optimizing Multihypothesis Diagnosis of Control-Actuator Failures in Linear Systems G90-104
Effects of Biodynamic Coupling on the Human Operator Model G90-090
Model for Human Use of Motion Cues in Vehicular Control G90-069
Aeroservoelastic Tailoring for Lateral Control Enhancement G90-067
Design and Evaluation of a Cockpit Display for Hovering Flight G90-066
Reduced-Order Modeling and Controller Design for a High-Performance Helicopter G90-065
Control of Unknown Systems via Deconvolution G90-062
Pilot-Vehicle Analysis of Multiaxis Tasks G90-047
Robust Control System Design Synthesis with Observers G90-045
Approximate Loop Transfer Recovery Method for Designing Fixed-Order Compensators G90-040
On the Level 2 Ratings of the Cooper-Harper Scale G90-026

Artificial Intelligence

Navigation Path Planning for Autonomous Aircraft: Voronoi Diagram Approach G90-163
Artificial Neural Networks, Back Propagation, and the Kelley-Bryson Gradient Procedure G90-133
Artificial Intelligence-Based Model-Adaptive Approach to Flexible Structure Control G90-076

Astrodynamics

Equations of Motion of a Rotating Rigid Body G90-162
Universal Formulation for the Perturbed Two-Body Problem G90-157
Orbit Determination Strategy and Accuracy for a Comet Rendezvous Mission G90-113
Analysis of an Onboard Antenna Pointing Control System G90-109
Analytical Models for Relative Motion Under Constant Thrust G90-092
Early Development of Transit, The Navy Navigation Satellite System (HKT) G90-083
Attitude Motion of a Nonattitude-Controlled Cylindrical Satellite G90-072
Orbital Dynamics in a Stochastic Atmosphere G90-070 G90-057
Functional Analysis Methods in the Study of the Optimal Transfer G90-051
Libration Damping of a Tethered Satellite by Yo-Yo Control with Angle Measurement G90-050
Constrained Initial Guidance Algorithm G90-027
New Form for the Optimal Rendezvous Equations Near a Keplerian Orbit G90-024

Control System Design

Approximation of Analog Controllers for Sampled-Data Systems G90-164
Robust Control Design with Real-Parameter Uncertainty and Unmodeled Dynamics G90-158
Guidance and Control for Cooperative Tether-Mediated Orbital Rendezvous G90-156
Redundant Single Gimbal Control Moment Gyroscope Singularity Analysis G90-155
Steering Law Design for Redundant Single-Gimbal Control Moment Gyroscopes G90-153
Pulse-Modulated Control Synthesis for a Flexible Spacecraft G90-145
Eigenstructure Assignment with Gain Suppression Using Eigenvalue and Eigenvector Derivatives G90-144
Periodic-Disturbance Accommodating Control of the Space Station for Asymptotic Momentum Management G90-141
Model Following Reconfigurable Flight Control System for the AFTI/F-16 G90-139
Proposal and Flight Evaluation of a New Pitch-Mode Decoupling System G90-138
Two-Time-Scale Longitudinal Control of Airplanes Using Singular Perturbation G90-137
Transfer Function Analysis of a Flexible Toroidal Structure G90-126
Approach to Large Space Structure Control System Design Using Traditional Tools G90-125
Minimum-Time Pointing Control of a Two-Link Manipulator G90-124
Nonlinear Flight Control Design via Sliding Methods G90-122
System Identification Requirements for High-Bandwidth Rotorcraft Flight Control System Design G90-120
Helicopter Trim with Flap-Lag-Torsion and Stall by an Optimized Controller G90-119
Control for Energy Dissipation in Structures G90-105
Positioning and Active Damping of Flexible Beams G90-100
Distributed Finite-Element Modeling and Control Approach for Large Flexible Structures G90-099
Simulation of Actively Controlled Spacecraft with Flexible Appendages G90-098
Pole/Zero Cancellations in Flexible Space Structures G90-097
Optimal Momentum Management Controller for the Space Station G90-094
Two Nonlinear Control Approaches for Retrieval of a Thrusting Tethered Subsatellite G90-093
Synthesis of Finite-Interval H_∞ Controllers by State-Space Methods G90-089
Linear-Quadratic-Regulator Pointing Control System for a High-Altitude Balloon Payload G90-088
Estimating Projections of the Controllable Set G90-081
Misstatements of the Test for Positive Semidefinite Matrices G90-080
Redundancy Control of a Free-Flying Telerobot G90-074
Cooperative Synthesis of Control and Display Augmentation in Approach and Landing G90-068
Aeroservoelastic Tailoring for Lateral Control Enhancement G90-067
Reduced-Order Modeling and Controller Design for a High-Performance Helicopter G90-065
Control of Unknown Systems via Deconvolution G90-062
Gain Margins and Phase Margins for Control Systems with Adjustable Parameters G90-060
Bang-Bang Control of Flexible Spacecraft Slewing Maneuvers: Guaranteed Terminal Pointing Accuracy G90-052
Robust Control System Design Synthesis with Observers G90-045
Suppression of Undesired Inputs of Linear Systems by Eigenspace Assignment G90-044
Sensitivity Controller for Uncertain Systems G90-043
Gain-Sensitivity Augmentation for Near-Optimal Control of Linear Parameter-Dependent Plants G90-042
Restructurable Control Using Proportional-Integral Implicit Model Following G90-041
Approximate Loop Transfer Recovery Method for Designing Fixed-Order Compensators G90-040
Class of Hierarchical Controllers and Their Blackboard Implementations G90-023
Analytical and Experimental Investigation of Output Feedback vs Linear Quadratic Regulator G90-021
Numerical Computation of Singular Control Functions in Trajectory Optimization Problems G90-020
Bank-to-Turn Missile Autopilot Design Using Loop Transfer Recovery G90-019
Linear-Quadratic Guidance Law for Dual Control of Homing Missiles G90-018
Spacecraft Mass Property Identification with Torque-Generating Control G90-013
Spacecraft Momentum Unloading: The Cell Mapping Approach G90-012
On the Nature of the Interaction Between Structures and Proof-Mass Actuators G90-011
Interactions Between Rigid-Body and Flexible-Body Motions in Maneuvering Spacecraft G90-010
Robust Linear Quadratic Gaussian Control for Flexible Structures G90-009
Near-Minimum Time, Closed-Loop Slewing of Flexible Spacecraft G90-008
Reduced-Order Compensator Design for a Flexible Structure G90-007

Control System Effectors

Pulse-Modulated Control Synthesis for a Flexible Spacecraft G90-145
Optimal Coupling Ratio Selection for Flexible Appendage Actuators G90-106
Sensor and Actuator Selection for Large Space Structure Control G90-035

Control System Sensors

Pulse-Modulated Control Synthesis for a Flexible Spacecraft G90-145
Extension of Strapdown Attitude Algorithm for High-Frequency Base Motion G90-103
Low-Frequency Response of Accelerometers for Observer Design in a Gravity Environment G90-102
Sensor Placement in Structural Control G90-075
Sensor and Actuator Selection for Large Space Structure Control G90-035

Control Theory

Approximation of Analog Controllers for Sampled-Data Systems G90-164
Robust Control Design with Real-Parameter Uncertainty and Unmodeled Dynamics G90-158
Periodic-Disturbance Accommodating Control of the Space Station for Asymptotic Momentum Management G90-141
Three-Dimensional Trajectory Optimization for Aircraft G90-135
Artificial Neural Networks, Back Propagation, and the Kelley-Bryson Gradient Procedure G90-133
How to Perform Differentiations on Matrices G90-132
Minimum-Time Pointing Control of a Two-Link Manipulator G90-124
Efficient Algorithm for Time-Optimal Control of a Two-Link Manipulator G90-123
Nonlinear Flight Control Design via Sliding Methods G90-122
Approximate Optimal Atmospheric Guidance Law for Aeroassisted Plane-Change Maneuvers G90-115
Optimal Coupling Ratio Selection for Flexible Appendage Actuators G90-106
Optimizing Multihypothesis Diagnosis of Control-Actuator Failures in Linear Systems G90-104
Optimal Momentum Management Controller for the Space Station G90-094
Synthesis of Finite-Interval H_∞ Controllers by State-Space Methods G90-089
Control of Unknown Systems via Deconvolution G90-062
Robust Control System Design Synthesis with Observers G90-045
Suppression of Undesired Inputs of Linear Systems by Eigenspace Assignment G90-044
Sensitivity Controller for Uncertain Systems G90-043
Gain-Sensitivity Augmentation for Near-Optimal Control of Linear Parameter-Dependent Plants G90-042
Restructurable Control Using Proportional-Integral Implicit Model Following G90-041
Approximate Loop Transfer Recovery Method for Designing Fixed-Order Compensators G90-040
Class of Hierarchical Controllers and Their Blackboard Implementations G90-023
Estimator Eigenvalue Placement in Positive Real Control G90-022
Analytical and Experimental Investigation of Output Feedback vs Linear Quadratic Regulator G90-021

Differential Games

Game Theory for Automated Maneuvering During Air-to-Air Combat G90-161
Qualitative Study of a Planar Pursuit Evasion Game in the Atmosphere G90-160
On the Approximate Solution of Complex Combat Games G90-017

Dynamics

Stability Condition for Flexible Structure Control with Mode Residualization G90-166
Equations of Motion of a Rotating Rigid Body G90-162
Universal Formulation for the Perturbed Two-Body Problem G90-157
Redundant Single Gimbal Control Moment Gyroscope Singularity Analysis G90-155
Finite Element Modeling of Frequency-Dependent Material Damping Using Augmenting Thermodynamic Fields G90-148
Efficient Eigenvalue Assignment for Large Space Structures G90-147
Hybrid Scaled Structural Dynamic Models and Their Use in Damping Prediction G90-146
Multibody Interaction Effects on Space Station Attitude Control and Momentum Management G90-142
Periodic-Disturbance Accommodating Control of the Space Station for Asymptotic Momentum Management G90-141
Reliable Algorithm for Modal Decomposition G90-128
Control for Energy Dissipation in Structures G90-105
Experimental Study of the Effects of Nonlinearities on Ground Resonance G90-101
Misstatements of the Test for Positive Semidefinite Matrices G90-080
Explicit-Implicit Staggered Procedure for Multibody Dynamics Analysis G90-079
Three Parallel Computation Methods for Structural Vibration Analysis G90-078
Orbital Dynamics in a Stochastic Atmosphere G90-070
Stability of Dynamical Systems: An Overview G90-058 G90-056 G90-055
Libration Damping of a Tethered Satellite by Yo-Yo Control with Angle Measurement G90-050
Hinges-Free and Hinges-Locked Modes of a Deformable Multibody Space Station—A Continuum Analysis G90-039
Control of Linear Dampers for Large Space Structures G90-033
Dynamics of an Arbitrary Flexible Body in Large Rotation and Translation G90-031
Maggi's Equations of Motion and the Determination of Constraint Reactions G90-030
Multibody System Order n Dynamics Formulation Based on Velocity Transform Method G90-029
Role of Maggi's Equations in Computational Methods for Constrained Multibody Systems G90-015
Tether Damping in Space G90-014

Engine Control

System Failure Isolation in Dynamic Systems G90-152

Flight Displays

Cooperative Synthesis of Control and Display Augmentation in Approach and Landing G90-068

Flight Mechanics

Effect of Thrust/Speed Dependence on Long-Period Dynamics in Supersonic Flight G90-167
Linear Helicopter Trackers Using Attitude Measurements G90-134
System Identification Requirements for High-Bandwidth Rotorcraft Flight Control System Design G90-120
Approximate Optimal Atmospheric Guidance Law for Aeroassisted Plane-Change Maneuvers G90-115
Maximum Orbit Plane Change with Heat-Transfer-Rate Considerations G90-071
Reduced-Order Modeling and Controller Design for a High-Performance Helicopter G90-065
Comparison of Test Signals for Aircraft Frequency Domain Identification G90-064
Optimal Explicit Guidance of Multistage Launch Vehicle Along Three-Dimensional Trajectory G90-059
Suppression of Undesired Inputs of Linear Systems by Eigenspace Assignment G90-044
Hinges-Free and Hinges-Locked Modes of a Deformable Multibody Space Station—A Continuum Analysis G90-039
Identification of Moderately Nonlinear Flight Mechanics Systems with Additive Process and Measurement Noise G90-038
Maggi's Equations of Motion and the Determination of Constraint Reactions G90-030
Multibody System Order n Dynamics Formulation Based on Velocity Transform Method G90-029
Time-Domain Aeroservoelastic Modeling Using Weighted Unsteady Aerodynamic Forces G90-005
Attitude Projection Method for Analyzing Large-Amplitude Airplane Maneuvers G90-004
Computational Method for Determining the No-Escape Envelope of a Short-Range Missile G90-001

Handling Qualities

Proposal and Flight Evaluation of a New Pitch-Mode Decoupling System G90-138
Effects of Biodynamic Coupling on the Human Operator Model G90-090
Model for Human Use of Motion Cues in Vehicular Control G90-069
Design and Evaluation of a Cockpit Display for Hovering Flight G90-066
Pilot-Vehicle Analysis of Multiaxis Tasks G90-047

Information Processing

Observability Analysis for Target Maneuver Estimation via Bearing-Only and Bearing-Rate-Only Measurements G90-140
Misstatements of the Test for Positive Semidefinite Matrices G90-080
Optimal Strapdown Attitude Integration Algorithms G90-049
Identification of Moderately Nonlinear Flight Mechanics Systems with Additive Process and Measurement Noise G90-038

Launch Vehicle Guidance and Control

Identification, Reduction, and Refinement of Model Parameters by the Eigensystem Realization Algorithm G90-149
Adaptive Guidance for an Aero-Assisted Boost Vehicle G90-084
Explicit-Implicit Staggered Procedure for Multibody Dynamics Analysis G90-079

Optimal Explicit Guidance of Multistage Launch Vehicle Along Three-Dimensional Trajectory G90-059
Efficacy of the Gibbs-Appell Method for Generating Equations of Motion for Complex Systems G89-015

Missile Dynamics

Stability of Dynamical Systems: An Overview G90-058

Missile Guidance and Control

Passive Homing Missile Guidance Law Based on New Target Maneuver Models G90-116
Reduction of Missile Navigation Errors by Roll Programming G90-107
Optimal Midcourse Guidance for Medium-Range Air-to-Air Missiles G90-086
Near-Optimal Midcourse Guidance for Air-to-Air Missiles G90-085
Sparse Jacobian Updates in the Collocation Method for Optimal Control Problems G90-061
Gain Margins and Phase Margins for Control Systems with Adjustable Parameters G90-060
Investigation of the Use of Acceleration Estimates by Endgame Guidance Laws G90-028
Bank-to-Turn Missile Autopilot Design Using Loop Transfer Recovery G90-019
Linear-Quadratic Guidance Law for Dual Control of Homing Missiles G90-018
Computational Method for Determining the No-Escape Envelope of a Short-Range Missile G90-001

Navigation

Maximum Likelihood Tuning of a Vehicle Motion Filter G90-121
Orbit Determination Strategy and Accuracy for a Comet Rendezvous Mission G90-113
Compressed Polynomial Approach for Onboard Ephemeris Representation G90-111
Reduction of Missile Navigation Errors by Roll Programming G90-107
Extension of Strapdown Attitude Algorithm for High-Frequency Base Motion G90-103
Early Development of Transit, The Navy Navigation Satellite System (HKT) G90-083
Optimal Strapdown Attitude Integration Algorithms G90-049

Optimization Techniques

Generalized Gradient Algorithm for Trajectory Optimization G90-168
Qualitative Study of a Planar Pursuit Evasion Game in the Atmosphere G90-160
Steering Law Design for Redundant Single-Gimbal Control Moment Gyroscopes G90-153
Artificial Neural Networks, Back Propagation, and the Kelley-Bryson Gradient Procedure G90-133
How to Perform Differentiations on Matrices G90-132
Optimal Autorotational Descent of a Helicopter with Control and State Inequality Constraints G90-131
Fixed Interval Smoothing: Revisited G90-130
Efficient Algorithm for Time-Optimal Control of a Two-Link Manipulator G90-123
Optimizing Multihypothesis Diagnosis of Control-Actuator Failures in Linear Systems G90-104
Estimating Projections of the Controllable Set G90-081
Sparse Jacobian Updates in the Collocation Method for Optimal Control Problems G90-061
Functional Analysis Methods in the Study of the Optimal Transfer G90-051
Optimal Strapdown Attitude Integration Algorithms G90-049
Gain-Sensitivity Augmentation for Near-Optimal Control of Linear Parameter-Dependent Plants G90-042
Fourier-Based Optimal Control Approach for Structural Systems G90-037
Investigation of the Use of Acceleration Estimates by Endgame Guidance Laws G90-028
Optimal Aeroassisted Orbital Plane Change with Heating-Rate Constraint G90-025
Class of Hierarchical Controllers and Their Blackboard Implementations G90-023
Estimator Eigenvalue Placement in Positive Real Control G90-022
Analytical and Experimental Investigation of Output Feedback vs Linear Quadratic Regulator G90-021
Numerical Computation of Singular Control Functions in Trajectory Optimization Problems G90-020
Bank-to-Turn Missile Autopilot Design Using Loop Transfer Recovery G90-019
Linear-Quadratic Guidance Law for Dual Control of Homing Missiles G90-018
On the Approximate Solution of Complex Combat Games G90-017
Numerical Approach for Solving Rigid Spacecraft Minimum Time Attitude Maneuvers G90-006

Pointing Systems

Linear-Quadratic-Regulator Pointing Control System for a High-Altitude Balloon Payload G90-088
Dynamics and Control of Spacecraft with Retargeting Flexible Antennas G90-034

Redundancy Management

System Failure Isolation in Dynamic Systems G90-152
Orthogonal Series Generalized Likelihood Ratio Test for Failure Detection and Isolation G90-151
Sensor Placement in Structural Control G90-075
Redundancy Control of a Free-Flying Telerobot G90-074

Remote Control

Redundancy Control of a Free-Flying Telerobot G90-074

Software Technology

Simulator Motion-Drive Algorithms: A Designer's Perspective G90-048

Spacecraft Dynamics

State-Variable Models of Structures Having Rigid-Body Modes G90-165
Efficient Eigenvalue Assignment for Large Space Structures G90-147
Hybrid Scaled Structural Dynamic Models and Their Use in Damping Prediction G90-146
Multibody Interaction Effects on Space Station Attitude Control and Momentum Management G90-142
Projection and Assembly Method for Multibody Component Model Reduction G90-129
Dynamics of Tethered Payloads with Deployment Rate Control G90-108
Analytical Model of the Rotation of an Artificial Satellite G90-091
Explicit-Implicit Staggered Procedure for Multibody Dynamics Analysis G90-079
Attitude Motion of a Nonattitude-Controlled Cylindrical Satellite G90-072
Stability of Dynamical Systems: An Overview G90-058
Hinges-Free and Hinges-Locked Modes of a Deformable Multibody Space Station—A Continuum Analysis G90-039
Decentralized Feedback Maneuver of Flexible Spacecraft G90-036
Control of Linear Dampers for Large Space Structures G90-033
Maggi's Equations of Motion and the Determination of Constraint Reactions G90-030
Multibody System Order n Dynamics Formulation Based on Velocity Transform Method G90-029
Role of Maggi's Equations in Computational Methods for Constrained Multibody Systems G90-015
Tether Damping in Space G90-014
Spacecraft Momentum Unloading: The Cell Mapping Approach G90-012
Interactions Between Rigid-Body and Flexible-Body Motions in Maneuvering Spacecraft G90-010

Spacecraft Guidance and Control

Optimal Reduced-Order Observer-Estimators G90-159
Guidance and Control for Cooperative Tether-Mediated Orbital Rendezvous G90-156
Redundant Single Gimbal Control Moment Gyroscope Singularity Analysis G90-155
Preferred Gimbal Angles for Single Gimbal Control Moment Gyros G90-154
Steering Law Design for Redundant Single-Gimbal Control Moment Gyroscopes G90-153
Spillover Stabilization of Large Space Structures G90-143
Multibody Interaction Effects on Space Station Attitude Control and Momentum Management G90-142
Approach to Large Space Structure Control System Design Using Traditional Tools G90-125
Compressed Polynomial Approach for Onboard Ephemeris Representation G90-111
Simulation of Actively Controlled Spacecraft with Flexible Appendages G90-098
Two Nonlinear Control Approaches for Retrieval of a Thrusting Tethered Subsatellite G90-093
Optimal Heading Change with Minimum Energy Loss for a Hypersonic Gliding Vehicle G90-087
Adaptive Guidance for an Aero-Assisted Boost Vehicle G90-084
Artificial Intelligence-Based Model-Adaptive Approach to Flexible Structure Control G90-076
Maximum Orbit Plane Change with Heat-Transfer-Rate Considerations G90-071
Orbital Dynamics in a Stochastic Atmosphere G90-070
Bang-Bang Control of Flexible Spacecraft Slewing Maneuvers: Guaranteed Terminal Pointing Accuracy G90-052
Libration Damping of a Tethered Satellite by Yo-Yo Control with Angle Measurement G90-050
Decentralized Feedback Maneuver of Flexible Spacecraft G90-036

Dynamics and Control of Spacecraft with Retargeting Flexible Antennas G90-034
Constrained Initial Guidance Algorithm G90-027
Optimal Aeroassisted Orbital Plane Change with Heating-Rate Constraint G90-025
Role of Maggi's Equations in Computational Methods for Constrained Multibody Systems G90-015
Tether Damping in Space G90-014
Spacecraft Mass Property Identification with Torque-Generating Control G90-013
Spacecraft Momentum Unloading: The Cell Mapping Approach G90-012
On the Nature of the Interaction Between Structures and Proof-Mass Actuators G90-011
Interactions Between Rigid-Body and Flexible-Body Motions in Maneuvering Spacecraft G90-010
Robust Linear Quadratic Gaussian Control for Flexible Structures G90-009
Near-Minimum Time, Closed-Loop Slewing of Flexible Spacecraft G90-008
Reduced-Order Compensator Design for a Flexible Structure G90-007
Numerical Approach for Solving Rigid Spacecraft Minimum Time Attitude Maneuvers G90-006
Efficacy of the Gibbs-Appell Method for Generating Equations of Motion for Complex Systems G89-015

State Estimation

State-Variable Models of Structures Having Rigid-Body Modes G90-165
Optimal Reduced-Order Observer-Estimators G90-159
Linear Helicopter Trackers Using Attitude Measurements G90-134
Fixed Interval Smoothing: Revisited G90-130
Maximum Likelihood Tuning of a Vehicle Motion Filter G90-121
Passive Homing Missile Guidance Law Based on New Target Maneuver Models G90-116
Orbit Determination Strategy and Accuracy for a Comet Rendezvous Mission G90-113
Low-Frequency Response of Accelerometers for Observer Design in a Gravity Environment G90-102
Estimating Projections of the Controllable Set G90-081
Three-Axis Attitude Determination via Kalman Filtering of Magnetometer Data G90-073
Identification of Moderately Nonlinear Flight Mechanics Systems with Additive Process and Measurement Noise G90-038
Estimator Eigenvalue Placement in Positive Real Control G90-022
Multitarget Classification and Estimation Using Clustering Techniques G90-016

Structural Control

State-Variable Models of Structures Having Rigid-Body Modes G90-165
Efficient Eigenvalue Assignment for Large Space Structures G90-147
Hybrid Scaled Structural Dynamic Models and Their Use in Damping Prediction G90-146
Spillover Stabilization of Large Space Structures G90-143
Transfer Function Analysis of a Flexible Toroidal Structure G90-126
Control for Energy Dissipation in Structures G90-105
Low-Frequency Response of Accelerometers for Observer Design in a Gravity Environment G90-102
Distributed Finite-Element Modeling and Control Approach for Large Flexible Structures G90-099
Simulation of Actively Controlled Spacecraft with Flexible Appendages G90-098
Pole/Zero Cancellations in Flexible Space Structures G90-097
Efficiency of Structure-Control Systems G90-077
Artificial Intelligence-Based Model-Adaptive Approach to Flexible Structure Control G90-076
Sensor Placement in Structural Control G90-075
Structural Tailoring and Feedback Control Synthesis: An Interdisciplinary Approach G90-063
Bang-Bang Control of Flexible Spacecraft Slewing Maneuvers: Guaranteed Terminal Pointing Accuracy G90-052
Decentralized Feedback Maneuver of Flexible Spacecraft G90-036
Sensor and Actuator Selection for Large Space Structure Control G90-035
Dynamics and Control of Spacecraft with Retargeting Flexible Antennas G90-034
Control of Linear Dampers for Large Space Structures G90-033
On the Nature of the Interaction Between Structures and Proof-Mass Actuators G90-011
Robust Linear Quadratic Gaussian Control for Flexible Structures G90-009
Near-Minimum Time, Closed-Loop Slewing of Flexible Spacecraft G90-008
Reduced-Order Compensator Design for a Flexible Structure G90-007

System Identification

Fixed Interval Smoothing: Revisited G90-130
Transfer Function Analysis of a Flexible Toroidal Structure G90-126
Maximum Likelihood Tuning of a Vehicle Motion Filter G90-121
Comparison of Test Signals for Aircraft Frequency Domain Identification G90-064
Sensitivity Controller for Uncertain Systems G90-043
Multitarget Classification and Estimation Using Clustering Techniques G90-016
Spacecraft Mass Property Identification with Torque-Generating Control G90-013

Trajectory Optimization

Generalized Gradient Algorithm for Trajectory Optimization G90-168
Qualitative Study of a Planar Pursuit Evasion Game in the Atmosphere G90-160
Inertial Energy Distribution Error Control for Optimal Wind-Shear Penetration G90-136
Efficient Algorithm for Time-Optimal Control of a Two-Link Manipulator G90-123
Optimal Paths Through Downbursts G90-117
Approximate Optimal Atmospheric Guidance Law for Aeroassisted Plane-Change Maneuvers G90-115
Aeroassisted Transfer Between Elliptical Orbits Using Lift Control G90-114
Analytical Models for Relative Motion Under Constant Thrust G90-092
Optimal Heading Change with Minimum Energy Loss for a Hypersonic Gliding Vehicle G90-087
Near-Optimal Midcourse Guidance for Air-to-Air Missiles G90-085
Maximum Orbit Plane Change with Heat-Transfer-Rate Considerations G90-071
Sparse Jacobian Updates in the Collocation Method for Optimal Control Problems G90-061
Functional Analysis Methods in the Study of the Optimal Transfer G90-051
Fourier-Based Optimal Control Approach for Structural Systems G90-037
Investigation of the Use of Acceleration Estimates by Endgame Guidance Laws G90-028
Optimal Aeroassisted Orbital Plane Change with Heating-Rate Constraint G90-025
Numerical Computation of Singular Control Functions in Trajectory Optimization Problems G90-020
On the Approximate Solution of Complex Combat Games G90-017
Computational Method for Determining the No-Escape Envelope of a Short-Range Missile G90-001

Interdisciplinary Topics

Analytical and Numerical Methods

Universal Formulation for the Perturbed Two-Body Problem G90-157
Eigenstructure Assignment with Gain Suppression Using Eigenvalue and Eigenvector Derivatives G90-144
Analytical Model of the Rotation of an Artificial Satellite G90-091 G90-082
Three Parallel Computation Methods for Structural Vibration Analysis G90-078

CAD/CAM

Second-Order Algorithm for Optimal Model Order Reduction G90-127

Human Factors

Simulator Motion-Drive Algorithms: A Designer's Perspective G90-048

Reliability, Maintainability, and Logistics Support

System Failure Isolation in Dynamic Systems G90-152

Launch Vehicle and Missile (LV/M) Technology

Command and Information Systems

Multitarget Classification and Estimation Using Clustering Techniques G90-016

Missile System

Near-Optimal Midcourse Guidance for Air-to-Air Missiles G90-085

Trajectories and Tracking Systems

Optimal Explicit Guidance of Multistage Launch Vehicle Along Three-Dimensional Trajectory G90-059

Space Technology

Numerical Approach for Solving Rigid Spacecraft Minimum Time Attitude Maneuvers G90-006

Aerobraking Flight Mechanics

Aeroassisted Transfer Between Elliptical Orbits Using Lift Control G90-114

Landers

Second-Order Algorithm for Optimal Model Order Reduction G90-127

Mission Trajectories (Earth and Interplanetary)

Compressed Polynomial Approach for On-board Ephemeris Representation G90-111
Optimal Heading Change with Minimum Energy Loss for a Hypersonic Gliding Vehicle G90-087 G90-057
New Form for the Optimal Rendezvous Equations Near a Keplerian Orbit G90-024

Space Systems

Analysis of an Onboard Antenna Pointing Control System G90-109
Early Development of Transit, The Navy Navigation Satellite System (HKT) G90-083

Spacecraft Attitude Determination

Analytical Model of the Rotation of an Artificial Satellite G90-091
Three-Axis Attitude Determination via Kalman Filtering of Magnetometer Data G90-073
Attitude Motion of a Nonattitude-Controlled Cylindrical Satellite G90-072

Spacecraft Structural Configuration, Design, and Analysis

Efficiency of Structure-Control Systems G90-077
Gravity Effects on Damping of a Space Structure with Pinned Joints G90-032

Structural Mechanics and Materials

Aeroelasticity and Control

Parameter Identification of Aeroelastic Modes of Rotary Wings from Transient Time Histories G90-095

Flexible and Active Structures

Positioning and Active Damping of Flexible Beams G90-100
Two Nonlinear Control Approaches for Retrieval of a Thrusting Tethered Subsatellite G90-093
Efficiency of Structure-Control Systems G90-077
Structural Tailoring and Feedback Control Synthesis: An Interdisciplinary Approach G90-063
Gravity Effects on Damping of a Space Structure with Pinned Joints G90-032

Structural Dynamics and Characterization

Finite Element Modeling of Frequency-Dependent Material Damping Using Augmenting Thermodynamic Fields G90-148
Pole/Zero Cancellations in Flexible Space Structures G90-097
Optimal Extraction of Structural Characteristics from Response Measurements G90-096
Three Parallel Computation Methods for Structural Vibration Analysis G90-078
Unfolding of Double-Zero Eigenvalue Bifurcations for Supersonic Flow Past a Pitching Wedge G90-046
Gravity Effects on Damping of a Space Structure with Pinned Joints G90-032
Dynamics of an Arbitrary Flexible Body in Large Rotation and Translation G90-031

Structural Finite Elements

Finite Element Modeling of Frequency-Dependent Material Damping Using Augmenting Thermodynamic Fields G90-148

Structural Modeling

Spillover Stabilization of Large Space Structures G90-143
Projection and Assembly Method for Multibody Component Model Reduction G90-129
Dynamics of Tethered Payloads with Deployment Rate Control G90-108
Distributed Finite-Element Modeling and Control Approach for Large Flexible Structures G90-099
Dynamics of an Arbitrary Flexible Body in Large Rotation and Translation G90-031

Structural Optimization

Structural Tailoring and Feedback Control Synthesis: An Interdisciplinary Approach G90-063

Structural Stability

Unfolding of Double-Zero Eigenvalue Bifurcations for Supersonic Flow Past a Pitching Wedge G90-046

Chronological Index

G88-059 Some Approximations for the Dynamics of Spacecraft Tethers. A. H. von Flotow, *Massachusetts Institute of Technology* (11, 4, p. 357) Article
Technical Comment by A. K. Misra, *McGill University, Canada* (13, 2, p. 380)
Reply (13, 2, p. 380)

G89-015 Efficacy of the Gibbs-Appell Method for Generating Equations of Motion for Complex Systems. Edward A. Desloge, *Florida State University* (12, 1, p. 114) Engineering Note
Technical Comment by David A. Levinson, *Lockheed Palo Alto Research Laboratory*; and Arun K. Banerjee, *Lockheed Missiles & Space Company* (13, 2, p. 381)
Reply (13, 2, p. 382)

G90-001 Computational Method for Determining the No-Escape Envelope of a Short-Range Missile. Frank Neuman, *NASA Ames Research Center* (13, 1, p. 6) Synoptic based on AIAA Paper 88-4137 CP889

G90-002 Simulation Investigation of the Effects of Helicopter Hovering Dynamics on Pilot Performance. Bimal L. Aponso, David G. Mitchell and Roger H. Hoh, *Systems Technology, Inc.* (13, 1, p. 8) Article based on AIAA Paper 87-2533 CP889

G90-003 Analysis and Design of Sidestick Controller Systems for General Aviation Aircraft. Daniel M. Martin and David R. Downing, *University of Kansas Center for Research, Inc.* (13, 1, p. 16) Article

G90-004 Attitude Projection Method for Analyzing Large-Amplitude Airplane Maneuvers. Osamu Kato, *Nagoya University, Japan* (13, 1, p. 22) Article

G90-005 Time-Domain Aeroservoelastic Modeling Using Weighted Unsteady Aerodynamic Forces. Mordechay Karpel, *Technion—Israel Institute of Technology* (13, 1, p. 30) Article

G90-006 Numerical Approach for Solving Rigid Spacecraft Minimum Time Attitude Maneuvers. Feiyue Li and Peter M. Bainum, *Howard University* (13, 1, p. 38) Article based on AIAA Paper 88-0675

G90-007 Reduced-Order Compensator Design for a Flexible Structure. Ph. C. Opdenacker, E. A. Jonckheere, M. G. Safonov and J. C. Juang, *University of Southern California*; and M. S. Lukich, *TRW, Inc.* (13, 1, p. 46) Article

G90-008 Near-Minimum Time, Closed-Loop Slewing of Flexible Spacecraft. R. M. Byers, S. R. Vadali and J. L. Junkins, *Texas A&M University* (13, 1, p. 57) Article

G90-009 Robust Linear Quadratic Gaussian Control for Flexible Structures. P. A. Bielloch, *Structural Dynamics Research Corporation*; and D. L. Mingori, *University of California, Los Angeles* (13, 1, p. 66) Article based on AIAA Paper 86-2051 CP889

G90-010 Interactions Between Rigid-Body and Flexible-Body Motions in Maneuvering Spacecraft. Larry M. Silverberg and Sungtae Park, *North Carolina State University* (13, 1, p. 73) Article

G90-011 On the Nature of the Interaction Between Structures and Proof-Mass Actuators. David C. Zimmerman, *University of Florida*; and Daniel J. Inman, *Brown University* (13, 1, p. 82) Article

G90-012 Spacecraft Momentum Unloading: The Cell Mapping Approach. H. Flashner, *University of Southern California*; and T. F. Burns, *TRW, Inc.* (13, 1, p. 89) Article

G90-013 Spacecraft Mass Property Identification with Torque-Generating Control. E. Bergmann, *Charles Stark Draper Laboratory, Inc.*; and J. Dzielski, *Pennsylvania State University* (13, 1, p. 99) Article

G90-014 Tether Damping in Space. Xiaohua He and J. David Powell, *Stanford University* (13, 1, p. 104) Article

G90-015 Role of Maggi's Equations in Computational Methods for Constrained Multibody Systems. Andrew Kurdila, John G. Papastavridis and Manohar P. Kamat, *Georgia Institute of Technology* (13, 1, p. 113) Article

G90-016 Multitarget Classification and Estimation Using Clustering Techniques. S. N. Balakrishnan and Byron D. Tapley, *University of Texas at Austin* (13, 1, p. 121) Article based on AIAA Paper 88-0571

G90-017 On the Approximate Solution of Complex Combat Games. Frank Neuman, *NASA Ames Research Center* (13, 1, p. 128) Article based on AIAA Paper 87-2395 CP878

G90-018 Linear-Quadratic Guidance Law for Dual Control of Homing Missiles. D. G. Hull, J. L. Speyer and D. B. Burris, *University of Texas at Austin* (13, 1, p. 137) Article

G90-019 Bank-to-Turn Missile Autopilot Design Using Loop Transfer Recovery. Kevin A. Wise, *McDonnell Douglas Astronautics Company* (13, 1, p. 145) Article based on AIAA Paper 88-0336

G90-020 Numerical Computation of Singular Control Functions in Trajectory Optimization Problems. Hans Joachim Oberle, *University of Hamburg, FRG* (13, 1, p. 153) Article

G90-021 Analytical and Experimental Investigation of Output Feedback vs Linear Quadratic Regulator. Zoran N. Martinovic, George C. Schamel II, Raphael T. Haftka and William L. Hallauer Jr., *Virginia Polytechnic Institute and State University* (13, 1, p. 160) Article based on AIAA Paper 87-2390 CP878

G90-022 Estimator Eigenvalue Placement in Positive Real Control. G. L. Slater and M. D. McLaren, *University of Cincinnati* (13, 1, p. 168) Article

G90-023 Class of Hierarchical Controllers and Their Blackboard Implementations. T. L. Skillman, W. Kohn, D. Nguyen, C. Ling and R. Dodhiawala, *Boeing Company* (13, 1, p. 176) Article based on AIAA Paper 87-2820 CP878

G90-024 New Form for the Optimal Rendezvous Equations Near a Keplerian Orbit. Thomas E. Carter, *Eastern Connecticut State University* (13, 1, p. 183) Engineering Note
Errata (13, 2, p. 384)

G90-025 Optimal Aeroassisted Orbital Plane Change with Heating-Rate Constraint. Fu-Kuo Hsu and Te-Son Kuo, *National Taiwan University, Taiwan, ROC*; and Jeng-Shing Chern, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (13, 1, p. 186) Engineering Note based on AIAA Paper 88-0301

G90-026 On the Level 2 Ratings of the Cooper-Harper Scale. David J. Moorhouse, *U.S. Air Force Wright Aeronautical Laboratories, Wright-Patterson AFB* (13, 1, p. 189) Engineering Note

G90-027 Constrained Initial Guidance Algorithm. John E. Cochran Jr. and Davy A. Haynes, *Auburn University* (13, 2, p. 193) Article

G90-028 Investigation of the Use of Acceleration Estimates by Endgame Guidance Laws. Douglas P. Looze, *University of Massachusetts*; John Y. Hsu and Daniel Grunberg, *ALPHATECH, Inc.* (13, 2, p. 198) Article

G90-029 Multibody System Order *n* Dynamics Formulation Based on Velocity Transform Method. J. E. Keat, *Cambridge Research, Photon Research Associates* (13, 2, p. 207) Article

G90-030 Maggi's Equations of Motion and the Determination of Constraint Reactions. John G. Papastavridis, *Georgia Institute of Technology* (13, 2, p. 213) Article

G90-031 Dynamics of an Arbitrary Flexible Body in Large Rotation and Translation. Arun K. Banerjee and John M. Dickens, *Lockheed Missiles & Space Company* (13, 2, p. 221) Article based on AIAA Paper 89-1308 CP891

G90-032 Gravity Effects on Damping of a Space Structure with Pinned Joints. Steven L. Folkman and Frank J. Redd, *Utah State University* (13, 2, p. 228) Article based on AIAA Paper 88-2449 CP883

G90-033 Control of Linear Dampers for Large Space Structures. J. K. Haviland, T. W. Lim, W. D. Pilkey and H. Politansky, *University of Virginia* (13, 2, p. 234) Article based on AIAA Paper 87-2251 CP875

G90-034 Dynamics and Control of Spacecraft with Retargeting Flexible Antennas. Leonard Meirovitch and Moon K. Kwak, *Virginia Polytechnic Institute and State University* (13, 2, p. 241) Article based on AIAA Paper 88-2414 CP882

G90-035 Sensor and Actuator Selection for Large Space Structure Control. M. L. DeLorenzo, *Air Command and Staff College, Maxwell AFB* (13, 2, p. 249) Article

G90-036 Decentralized Feedback Maneuver of Flexible Spacecraft. Larry Silverberg and Lester A. Foster, *North Carolina State University* (13, 2, p. 258) Article

G90-037 Fourier-Based Optimal Control Approach for Structural Systems. Vincent Yen and Mark L. Nagurka, *Carnegie-Mellon University* (13, 2, p. 265) Article

G90-038 Identification of Moderately Nonlinear Flight Mechanics Systems with Additive Process and Measurement Noise. Ravindra V. Jategaonkar and Ermin Plaetschke, *Institute for Flight Mechanics. DFVLR, FRG* (13, 2, p. 277) Article based on AIAA Paper 88-4347 CP8810

G90-039 Hinges-Free and Hinges-Locked Modes of a Deformable Multibody Space Station—A Continuum Analysis. Hari B. Hablani, *Rockwell International* (13, 2, p. 286) Article based on AIAA Paper 87-0925 CP873

G90-040 Approximate Loop Transfer Recovery Method for Designing Fixed-Order Compensators. Anthony J. Calise and J. V. R. Prasad, *Georgia Institute of Technology* (13, 2, p. 297) Article based on AIAA Paper 88-4078 CP889

G90-041 Restructurable Control Using Proportional-Integral Implicit Model Following. Chien Y. Huang and Robert F. Stengel, *Princeton University* (13, 2, p. 303) Article based on AIAA Paper 87-2312 CP878

G90-042 Gain-Sensitivity Augmentation for Near-Optimal Control of Linear Parameter-Dependent Plants. Peter L. Graf and Rahmat Shoureshi, *Purdue University* (13, 2, p. 310) Article

G90-043 Sensitivity Controller for Uncertain Systems. Kenji Okada, *Mitsubishi Electric Corporation, Japan*; and Robert E. Skelton, *Purdue University* (13, 2, p. 321) Article

G90-044 Suppression of Undesired Inputs of Linear Systems by Eigenspace Assignment. Qiang Zhang, G. L. Slater and R. J. Allemang, *University of Cincinnati* (13, 2, p. 330) Article

G90-045 Robust Control System Design Synthesis with Observers. Tsuyoshi Okada, Masahiko Kihara and Masakazu Ikeda, *National Defense Academy, Japan* (13, 2, p. 337) Article

G90-046 Unfolding of Double-Zero Eigenvalue Bifurcations for Supersonic Flow Past a Pitching Wedge. N. Sri Namachchivaya, *University of Illinois*; and H. J. Van Roessel, *University of Alberta, Canada* (13, 2, p. 343) Article

G90-047 Pilot-Vehicle Analysis of Multiaxis Tasks. Duane McRuer, *Systems Technology, Inc.*; and David K. Schmidt, *Purdue University* (13, 2, p. 348) Article based on AIAA Paper 87-2538 CP878

G90-048 Simulator Motion-Drive Algorithms: A Designer's Perspective. Meyer A. Nahon and Lloyd D. Reid, *University of Toronto, Canada* (13, 2, p. 356) Article

G90-049 Optimal Strapdown Attitude Integration Algorithms. M. B. Ignagni, *Honeywell Systems and Research Center* (13, 2, p. 363) Article
Errata (13, 3, p. 576)

G90-050 Libration Damping of a Tethered Satellite by Yo-Yo Control with Angle Measurement. W. R. Davis and A. K. Banerjee, *Lockheed Missiles & Space Company* (13, 2, p. 370) Engineering Note

G90-051 Functional Analysis Methods in the Study of the Optimal Transfer. Mihai Popescu and Tina Popescu, *National Institute for Scientific and Technical Creation, Romania* (13, 2, p. 374) Engineering Note

G90-052 Bang-Bang Control of Flexible Spacecraft Slewing Maneuvers: Guaranteed Terminal Pointing Accuracy. G. Singh, P. T. Kabamba and N. H. McClamroch, *University of Michigan* (13, 2, p. 376) Engineering Note

G90-058 Stability of Dynamical Systems: An Overview. S. Pradeep and S. K. Shrivastava, *Indian Institute of Science* (13, 3, p. 385) Survey Paper

G90-059 Optimal Explicit Guidance of Multistage Launch Vehicle Along Three-Dimensional Trajectory. S. K. Sinha, *Indian Space Research Organization Headquarters*; and S. K. Shrivastava, *Indian Institute of Science* (13, 3, p. 394) Article

G90-060 Gain Margins and Phase Margins for Control Systems with Adjustable Parameters. Che-Hsu Chang, *National Chiao-Tung University, Taiwan, ROC*; and Kuang-Wei Han, *Chung-Shan Institute of Science and Technology, Taiwan, ROC* (13, 3,

G90-061 Sparse Jacobian Updates in the Collocation Method for Optimal Control Problems. John T. Betts, *Boeing Computer Services* (13, 3, p. 409) Article based on AIAA Paper 88-4150 CP889

G90-062 Control of Unknown Systems via Deconvolution. Hsi-Han Yeh, Siva S. Banda and P. J. Lynch, *Flight Dynamics Laboratory, Wright-Patterson AFB* (13, 3, p. 416) Article based on AIAA Paper 87-2310 CP878

G90-063 Structural Tailoring and Feedback Control Synthesis: An Interdisciplinary Approach. W. Keith Belvin, *NASA Langley Research Center*; and K. C. Park, *University of Colorado* (13, 3, p. 424) Article based on AIAA Paper 88-2206 CP882

G90-064 Comparison of Test Signals for Aircraft Frequency Domain Identification. Peter Young and Ronald J. Patton, *University of York, England, UK* (13, 3, p. 430) Article based on AIAA Paper 88-4349 CP8810

G90-065 Reduced-Order Modeling and Controller Design for a High-Performance Helicopter. Mark Ekblad, *University of Minnesota* (13, 3, p. 439) Article based on AIAA Paper 88-4501

G90-066 Design and Evaluation of a Cockpit Display for Hovering Flight. Ronald A. Hess and Peter J. Gorder, *University of California, Davis* (13, 3, p. 450) Article based on AIAA Paper 88-4495

G90-067 Aeroservoelastic Tailoring for Lateral Control Enhancement. Terrence A. Weisshaar and Changho Nam, *Purdue University* (13, 3, p. 458) Article

G90-068 Cooperative Synthesis of Control and Display Augmentation in Approach and Landing. Sanjay Garg and David K. Schmidt, *Purdue University* (13, 3, p. 466) Article based on AIAA Paper 88-4182 CP889

G90-069 Model for Human Use of Motion Cues in Vehicular Control. Ronald A. Hess, *University of California, Davis* (13, 3, p. 476) Article

G90-070 Orbital Dynamics in a Stochastic Atmosphere. J. de Lafontaine, *European Space Research and Technology Centre, the Netherlands* (13, 3, p. 483) Article

G90-071 Maximum Orbit Plane Change with Heat-Transfer-Rate Considerations. J. Y. Lee and D. G. Hull, *University of Texas at Austin* (13, 3, p. 492) Article

G90-072 Attitude Motion of a Nonattitude-Controlled Cylindrical Satellite. Charles K. Wilkinson, *Textron Defense Systems* (13, 3, p. 498) Article based on AIAA Paper 88-4223 CP8811

G90-073 Three-Axis Attitude Determination via Kalman Filtering of Magnetometer Data. Mark L. Psiaki, *Cornell University*; François Martel and Parimal K. Pal, *Ithaco, Inc.* (13, 3, p. 506) Article

G90-074 Redundancy Control of a Free-Flying Telerobot. John R. Spofford, *Martin Marietta Astronautics Group*; and David L. Akin, *Massachusetts Institute of Technology* (13, 3, p. 515) Article based on AIAA Paper 88-4094 CP889

G90-075 Sensor Placement in Structural Control. H. Baruh and K. Choe, *Rutgers University* (13, 3, p. 524) Article based on AIAA Paper 88-4056 CP889

G90-076 Artificial Intelligence-Based Model-Adaptive Approach to Flexible Structure Control. S. Hanagud, B. J. Glass and A. J. Calise, *Georgia Institute of Technology* (13, 3, p. 534) Article based on AIAA Paper 87-2457 CP878

G90-077 Efficiency of Structure-Control Systems. H. Öz and K. Farag, *Ohio State University*; and V. B. Venkayya, *Flight Dynamics Laboratory, Wright-Patterson AFB* (13, 3, p. 545) Article

G90-078 Three Parallel Computation Methods for Structural Vibration Analysis. Olaf Storaasli and Susan Bostic, *NASA Langley Research Center*; Merrell Patrick, Umesh Mahajan and Shing Ma, *Duke University* (13, 3, p. 555) Article based on AIAA Paper 88-2391 CP882

G90-079 Explicit-Implicit Staggered Procedure for Multibody Dynamics Analysis. K. C. Park, J. C. Chiou and J. D. Downer, *University of Colorado* (13, 3, p. 562) Article

G90-080 Misstatements of the Test for Positive Semidefinite Matrices. Thomas H. Kerr, *Massachusetts Institute of Technology, Lincoln Laboratory* (13, 3, p. 571) Engineering Note

G90-081 Estimating Projections of the Controllable Set. Thomas L. Vincent and Zong Y. Wu, *University of Arizona* (13, 3, p. 572) Engineering Note

G90-083 Early Development of Transit, The Navy Navigation Satellite System (HKT). Harold D. Black, *Johns Hopkins University Applied Physics Laboratory* (13, 4, p. 577) Article

G90-084 Adaptive Guidance for an Aero-Assisted Boost Vehicle. Bandu N. Pamadi, *Vigyan Research Associates, Inc.*; Lawrence W. Taylor Jr. and Douglas B. Price, *NASA Langley Research Center* (13, 4, p. 586) Article based on AIAA Paper 88-4173 CP889

G90-085 Near-Optimal Midcourse Guidance for Air-to-Air Missiles. P. K. A. Menon, *Georgia Institute of Technology*; and M. M. Briggs, *Integrated Systems, Inc.* (13, 4, p. 596) Article

G90-086 Optimal Midcourse Guidance for Medium-Range Air-to-Air Missiles. Fumiaki Imado and Takeshi Kuroda, *Mitsubishi Electric Corporation, Japan*; and Susumu Miwa, *Tokyo Denki University, Japan* (13, 4, p. 603) Article based on AIAA Paper 88-4063 CP889

G90-087 Optimal Heading Change with Minimum Energy Loss for a Hypersonic Gliding Vehicle. Anthony J. Calise and Gyoung H. Bae, *Georgia Institute of Technology* (13, 4, p. 609) Article

G90-088 Linear-Quadratic-Regulator Pointing Control System for a High-Altitude Balloon Payload. John E. White and Jerry R. Etter, *Sandia National Laboratories* (13, 4, p. 615) Article based on AIAA Paper 88-4109 CP889

G90-089 Synthesis of Finite-Interval H_∞ Controllers by State-Space Methods. M. B. Subrahmanyam, *Naval Air Development Center* (13, 4, p. 624) Article

G90-090 Effects of Biodynamic Coupling on the Human Operator Model. M. Idan, *Stanford University*; and S. J. Merhav, *Technion—Israel Institute of Technology* (13, 4, p. 630) Article

G90-091 Analytical Model of the Rotation of an Artificial Satellite. E. Bois and J. Kovalevsky, *Observatoire de la Côte d'Azur, France* (13, 4, p. 638) Article

G90-092 Analytical Models for Relative Motion Under Constant Thrust. J. Van der Ha and R. Mugellesi, *European Space Agency, FRG* (13, 4, p. 644) Article based on AIAA Paper 88-4300 CP8811

G90-093 Two Nonlinear Control Approaches for Retrieval of a Thrusting Tethered Subsatellite. D. J. Pines and A. H. von Flotow, *Massachusetts Institute of Technology*; and D. C. Redding, *Charles Stark Draper Laboratory* (13, 4, p. 651) Article based on AIAA Paper 88-4171 CP889

G90-094 Optimal Momentum Management Controller for the Space Station. J. W. Sunkel, *NASA Johnson Space Center*; and L. S. Shieh, *University of Houston* (13, 4, p. 659) Article based on AIAA Paper 89-3473 CP899

G90-095 Parameter Identification of Aeroelastic Modes of Rotary Wings from Transient Time Histories. Ahmed Omar Amrani and Ronald Du Val, *Advanced Rotorcraft Technology, Inc.* (13, 4, p. 669) Article

G90-096 Optimal Extraction of Structural Characteristics from Response Measurements. An-Chen Lee and Juhn-Horng Chen, *National Chiao Tung University, Taiwan, ROC* (13, 4, p. 675) Article

G90-097 Pole/Zero Cancellations in Flexible Space Structures. Trevor Williams and Jer-Nan Juang, *NASA Langley Research Center* (13, 4, p. 684) Article based on AIAA Paper 88-4055 CP889

G90-098 Simulation of Actively Controlled Spacecraft with Flexible Appendages. R. R. Ryan, *University of Michigan* (13, 4, p. 691) Article based on AIAA Paper 87-0478

G90-099 Distributed Finite-Element Modeling and Control Approach for Large Flexible Structures. K. David Young, *Lawrence Livermore National Laboratory, University of California* (13, 4, p. 703) Article based on AIAA Paper 88-4085 CP889

G90-100 Positioning and Active Damping of Flexible Beams. Thomas L. Vincent, Yeong Ching Lin and Shiv P. Joshi, *University of Arizona* (13, 4, p. 714) Article

G90-101 Experimental Study of the Effects of Nonlinearities on Ground Resonance. George T. Flowers, *Auburn University*; and Benson H. Tongue, *University of California, Berkeley* (13, 4, p. 725) Article

G90-102 Low-Frequency Response of Accelerometers for Observer Design in a Gravity Environment. M. A. Norris, *Virginia Polytechnic Institute and State University*; R. C. Thompson, *Pennsylvania State University*; and A. Das, *Air Force Astronautics Laboratory, Edwards AFB* (13, 4, p. 732) Article

G90-103 Extension of Strapdown Attitude Algorithm for High-Frequency Base Motion. Jang G. Lee and Yong J. Yoon, *Seoul National University, Korea;* John G. Mark and Daniel A. Tazartes, *Litton Systems, Inc.* (13, 4, p. 738) Article based on AIAA Paper 88-4126 CP889

G90-104 Optimizing Multihypothesis Diagnosis of Control-Actuator Failures in Linear Systems. Yakov Ben-Haim, *Technion—Israel Institute of Technology* (13, 4, p. 744) Article

G90-105 Control for Energy Dissipation in Structures. S. P. Joshi, T. L. Vincent and Y. C. Lin, *University of Arizona* (13, 4, p. 751) Engineering Note based on AIAA Paper 88-2272 CP882

G90-106 Optimal Coupling Ratio Selection for Flexible Appendage Actuators. John B. Stetson Jr., *General Electric Company* (13, 4, p. 754) Engineering Note

G90-107 Reduction of Missile Navigation Errors by Roll Programming. Robert J. Fitzgerald, *Raytheon Company* (13, 4, p. 755) Engineering Note based on AIAA Paper 88-4090 CP889

G90-108 Dynamics of Tethered Payloads with Deployment Rate Control. Arun K. Banerjee, *Lockheed Missiles & Space Company* (13, 4, p. 759) Engineering Note

G90-109 Analysis of an Onboard Antenna Pointing Control System. Yoichi Kawakami, Hiroshi Hojo and Masazumi Ueba, *Nippon Telegraph and Telephone Corporation, Radio Communication Systems Laboratories, Japan* (13, 4, p. 762) Engineering Note based on AIAA Paper 88-4306 CP8811

G90-110 Calculation of Stability Derivatives for Slender Bodies Using Boundary Element Method. Shinji Suzuki and Kizuki Fukuda, *University of Tokyo, Japan* (13, 4, p. 763) Engineering Note

G90-111 Compressed Polynomial Approach for Onboard Ephemeris Representation. B. V. Sheela and P. Padmanabhan, *Indian Space Research Organization Satellite Centre* (13, 4, p. 765) Engineering Note

G90-112 In Appreciation of Arthur E. Bryson, Jr. (Keynote Paper) Y. C. Ho, *Harvard University;* and J. L. Speyer, *University of California, Los Angeles* (13, 5, p. 770) Article

G90-113 Orbit Determination Strategy and Accuracy for a Comet Rendezvous Mission. James K. Miller, *Jet Propulsion Laboratory, California Institute of Technology;* Connie J. Weeks, *Loyola Marymount University;* and Lincoln J. Wood, *Jet Propulsion Laboratory, California Institute of Technology* (13, 5, p. 775) Article based on AIAA Paper 89-0348

G90-114 Aeroassisted Transfer Between Elliptical Orbits Using Lift Control. David Mishne, *Rafael, Israel;* Nahum Melamed and Josef Shinar, *Technion—Israel Institute of Technology* (13, 5, p. 785) Article based on AIAA Paper 88-4346 CP8810

G90-115 Approximate Optimal Atmospheric Guidance Law for Aeroassisted Plane-Change Maneuvers. Jason L. Speyer and Edwin Z. Crues, *University of Texas at Austin* (13, 5, p. 792) Article based on AIAA Paper 88-4174 CP 889

G90-116 Passive Homing Missile Guidance Law Based on New Target Maneuver Models. Jason L. Speyer and Kevin D. Kim, *University of Texas at Austin*; and Minjea Tahk, *Korea Advanced Institute of Science and Technology* (13, 5, p. 803) Article based on AIAA Paper 90-3378 CP909

G90-117 Optimal Paths Through Downbursts. Yiyuan Zhao, *University of Minnesota*; and A. E. Bryson Jr., *Stanford University* (13, 5, p. 813) Article

G90-118 Control of an Aircraft in Downbursts. Yiyuan Zhao, *University of Minnesota*; and A. E. Bryson Jr., *Stanford University* (13, 5, p. 819) Article

G90-119 Helicopter Trim with Flap-Lag-Torsion and Stall by an Optimized Controller. David A. Peters, Mnaouar Chouchane and Mark Fulton, *Georgia Institute of Technology* (13, 5, p. 824) Article

G90-120 System Identification Requirements for High-Bandwidth Rotorcraft Flight Control System Design. Mark B. Tischler, *Aeroflightdynamics Directorate, U.S Army Aviation Research and Technology Activity, Ames Research Center* (13, 5, p. 835) Article

G90-121 Maximum Likelihood Tuning of a Vehicle Motion Filter. Thomas L. Trankle and Uri H. Rabin, *Systems Control Technology* (13, 5, p. 842) Article

G90-122 Nonlinear Flight Control Design via Sliding Methods. J. Karl Hedrick and Swaminathan Gopalswamy, *University of California, Berkeley* (13, 5, p. 850) Article

G90-123 Efficient Algorithm for Time-Optimal Control of a Two-Link Manipulator. Elke-Barbara Meier, *Ball Aerospace Systems Division*; and Arthur E. Bryson Jr., *Stanford University* (13, 5, p. 859) Article based on AIAA Paper 87-2263 CP878

G90-124 Minimum-Time Pointing Control of a Two-Link Manipulator. Bong Wie, *Arizona State University;* Chien-Hsiung Chuang, *University of Texas at Austin;* and John Sunkel, *NASA Johnson Space Center* (13, 5, p. 867) Article based on AIAA Paper 88-4117 CP 889

G90-125 Approach to Large Space Structure Control System Design Using Traditional Tools. P. Y. Chu, B. Wie, B. Gretz and C. Plescia, *Ford Aerospace Corporation* (13, 5, p. 874) Article

G90-126 Transfer Function Analysis of a Flexible Toroidal Structure. Bong Wie, *Arizona State University*; and Arthur E. Bryson Jr., *Stanford University* (13, 5, p. 881) Article

G90-127 Second-Order Algorithm for Optimal Model Order Reduction. A. E. Bryson Jr. and A. Carrier, *Stanford University* (13, 5, p. 887) Article

G90-128 Reliable Algorithm for Modal Decomposition. Robert A. Walker and Arthur E. Bryson Jr., *Stanford University* (13, 5, p. 893) Article

G90-129 Projection and Assembly Method for Multibody Component Model Reduction. Douglas E. Bernard, *Jet Propulsion Laboratory, California Institute of Technology* (13, 5, p. 905) Article

G90-130 Fixed Interval Smoothing: Revisited. Stephen Ralph McReynolds, *General Electric Company* (13, 5, p. 913) Article

G90-131 Optimal Autorotational Descent of a Helicopter with Control and State Inequality Constraints. Allan Y. Lee, *Jet Propulsion Laboratory, California Institute of Technology* (13, 5, p. 922) Engineering Note

G90-132 How to Perform Differentiations on Matrices. Jerry L. Sun, *Systems Control Technology, Inc.* (13, 5, p. 924) Engineering Note

G90-133 Artificial Neural Networks, Back Propagation, and the Kelley-Bryson Gradient Procedure. Stuart E. Dreyfus, *University of California, Berkeley* (13, 5, p. 926) Engineering Note

G90-134 Linear Helicopter Trackers Using Attitude Measurements. John D. Schierman and Dominick Andrisani II, *Purdue University* (13, 6, p. 929) Article

G90-135 Three-Dimensional Trajectory Optimization for Aircraft. Robert L. Schultz, *Honeywell, Inc.* (13, 6, p. 936) Article

G90-136 Inertial Energy Distribution Error Control for Optimal Wind-Shear Penetration. K. Krishnakumar and J. E. Bailey, *University of Alabama* (13, 6, p. 944) Article based on AIAA Paper 89-0016

G90-137 Two-Time-Scale Longitudinal Control of Airplanes Using Singular Perturbation. Fu-Chuang Chen and Hassan K. Khalil, *Michigan State University* (13, 6, p. 952) Article based on AIAA Paper 88-4112 CP889

G90-138 Proposal and Flight Evaluation of a New Pitch-Mode Decoupling System. Masaki Komoda, *Tokyo Metropolitan Institute of Technology, Japan*; Nagakatu Kawahata, *Nihon University, Japan*; Yukichi Tsukano and Takatsugu Ono, *National Aerospace Laboratory, Japan* (13, 6, p. 961) Article based on AIAA Paper 88-4605 CP8812

G90-139 Model Following Reconfigurable Flight Control System for the AFTI/F-16. W. D. Morse, *Sandia National Laboratories*; and K. A. Ossman, *Ohio State University* (13, 6, p. 969) Article

G90-140 Observability Analysis for Target Maneuver Estimation via Bearing-Only and Bearing-Rate-Only Measurements. Stephan A. R. Hepner and Hans P. Geering, *Swiss Federal Institute of Technology* (13, 6, p. 977) Article based on AIAA Paper 87-2382 CP878

G90-141 Periodic-Disturbance Accommodating Control of the Space Station for Asymptotic Momentum Management. Wayne Warren and Bong Wie, *Arizona State University*; and David Geller, *NASA Johnson Space Center* (13, 6, p. 984) Article based on AIAA Paper 89-3476 CP899

G90-142 Multibody Interaction Effects on Space Station Attitude Control and Momentum Management. Bong Wie, *Arizona State University*; Anren Hu and Ramendra Singh, *Dynacs Engineering Company, Inc.* (13, 6, p. 993) Article based on AIAA Paper 89-3514 CP899

G90-143 Spillover Stabilization of Large Space Structures. Eva A. Czajkowski, *Virginia Polytechnic Institute and State University*; Andre Preumont, *Free University of Brussels, Belgium*; and Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (13, 6, p. 1000) Article based on AIAA Paper 88-2484 CP883

G90-144 Eigenstructure Assignment with Gain Suppression Using Eigenvalue and Eigenvector Derivatives. Kenneth M. Sobel and Wangling Yu, *City College of New York*; and Frederick J. Lallman, *NASA Langley Research Center* (13, 6, p. 1008) Article based on AIAA Paper 88-4101 CP889

G90-145 Pulse-Modulated Control Synthesis for a Flexible Spacecraft. Tobin C. Anthony and Bong Wie, *University of Texas at Austin*; and Stanley Carroll, *NASA Marshall Space Flight Center* (13, 6, p. 1014) Article based on AIAA Paper 89-3433 CP898

G90-146 Hybrid Scaled Structural Dynamic Models and Their Use in Damping Prediction. Edward F. Crawley, Jonathan L. Sigler and Marthinus C. van Schoor, *Massachusetts Institute of Technology*; and Marc J. Gronet, *Lockheed Missile & Space Company* (13, 6, p. 1023) Article

G90-147 Efficient Eigenvalue Assignment for Large Space Structures. Peiman G. Maghami and Jer-Nan Juang, *NASA Langley Research Center* (13, 6, p. 1033) Article based on AIAA Paper 89-1393 CP891

G90-148 Finite Element Modeling of Frequency-Dependent Material Damping Using Augmenting Thermodynamic Fields. George A. Lesieutre, *SPARTA, Inc.*; and D. Lewis Mingori, *University of California, Los Angeles* (13, 6, p. 1040) Article based on AIAA Paper 89-1380 CP891

G90-149 Identification, Reduction, and Refinement of Model Parameters by the Eigensystem Realization Algorithm. Ciann-Dong Yang, *National Cheng Kung University, Taiwan, ROC*; and Fang-Bo Yeh, *Tunghai University, Taiwan, ROC* (13, 6, p. 1051) Article

G90-150 Lateral Stability of Gliding Parachutes. Peter Crimi, *Textron Defense Systems* (13, 6, p. 1060) Article

G90-151 Orthogonal Series Generalized Likelihood Ratio Test for Failure Detection and Isolation. Steven R. Hall, *Massachusetts Institute of Technology*; and Bruce K. Walker, *University of Cincinnati* (13, 6, p. 1064) Article

G90-152 System Failure Isolation in Dynamic Systems. Dan T. Horak, *Allied-Signal Aerospace Company* (13, 6, p. 1075) Article

G90-153 Steering Law Design for Redundant Single-Gimbal Control Moment Gyroscopes. Nazareth S. Bedrossian, Joseph Paradiso and Edward V. Bergmann, *Charles Stark Draper Laboratory, Inc.*; and Derek Rowell, *Massachusetts Institute of Technology* (13, 6, p. 1083) Article

G90-154 Preferred Gimbal Angles for Single Gimbal Control Moment Gyros. S. R. Vadali, H-S. Oh and S. R. Walker, *Texas A&M University* (13, 6, p. 1090) Article based on AIAA Paper 89-3477 CP899

G90-155 Redundant Single Gimbal Control Moment Gyroscope Singularity Analysis. Nazareth S. Bedrossian, Joseph Paradiso and Edward V. Bergmann, *Charles Stark Draper Laboratory, Inc.*; and Derek Rowell, *Massachusetts Institute of Technology* (13, 6, p. 1096) Article

G90-156 Guidance and Control for Cooperative Tether-Mediated Orbital Rendezvous. Dale G. Stuart, *TRW Space and Technology Group* (13, 6, p. 1102) Article based on AIAA Paper 88-4170 CP889

G90-157 Universal Formulation for the Perturbed Two-Body Problem. Pedro E. Zadunaisky, *Comision Nacional de Investigaciones Espaciales, Argentina*; and Claudia M. Giordano, *Universidad Nacional de La Plata, Argentina* (13, 6, p. 1109) Article

G90-158 Robust Control Design with Real-Parameter Uncertainty and Unmodeled Dynamics. Hsi-Han Yeh, Siva S. Banda and Sharon A. Heise, *Flight Dynamics Laboratory, Wright-Patterson AFB*; and Andrew C. Bartlett, *University of Massachusetts* (13, 6, p. 1117) Article

G90-159 Optimal Reduced-Order Observer-Estimators. Wassim M. Haddad, *Florida Institute of Technology*; and Dennis S. Bernstein, *Harris Corporation* (13, 6, p. 1126) Article

G90-160 Qualitative Study of a Planar Pursuit Evasion Game in the Atmosphere. M. Guelman, *Rafael, Ministry of Defense, Israel;* J. Shinar and A. Green, *Technion—Israel Institute of Technology* (13, 6, p. 1136) Article

G90-161 Game Theory for Automated Maneuvering During Air-to-Air Combat. Fred Austin, Giro Carbone, Michael Falco and Hans Hinz, *Grumman Corporate Research Center*; and Michael Lewis, *NASA Ames Research Center* (13, 6, p. 1143) Article based on AIAA Paper 87-2393 CP878

G90-162 Equations of Motion of a Rotating Rigid Body. R. A. Broucke, *University of Texas at Austin* (13, 6, p. 1150) Engineering Note

G90-163 Navigation Path Planning for Autonomous Aircraft: Voronoi Diagram Approach. Jimmy Krozel and Dominick Andrisani II, *Purdue University* (13, 6, p. 1152) Engineering Note

G90-164 Approximation of Analog Controllers for Sampled-Data Systems. Ricardo S. Sánchez Peña, *Instituto de Investigaciones Aeronáuticas y Espaciales, Centro Espacial San Miguel, Argentina* (13, 6, p. 1155) Engineering Note

G90-165 State-Variable Models of Structures Having Rigid-Body Modes. Roy R. Craig Jr., Tsu-Jeng Su and Zhenhua Ni, *University of Texas at Austin* (13, 6, p. 1157) Engineering Note

G90-166 Stability Condition for Flexible Structure Control with Mode Residualization. Chun-Liang Lin and Fei-Bin Hsiao, *National Cheng Kung University, Taiwan, ROC*; and Bor-Sen Chen, *National Tsing Hua University, Taiwan, ROC* (13, 6, p. 1160) Engineering Note

G90-167 Effect of Thrust/Speed Dependence on Long-Period Dynamics in Supersonic Flight. Gottfried Sachs, *Technische Universität München, Germany* (13, 6, p. 1163) Engineering Note

G90-168 Generalized Gradient Algorithm for Trajectory Optimization. Yiyuan Zhao, *University of Minnesota*; A. E. Bryson Jr. and R. Slattery, *Stanford University* (13, 6, p. 1166) Engineering Note
